

Aathangarai Pillayar Koil

In 90's Pillayar idol was under Peepal Tree. Somewhere between 1995 to 1998, Shri Suppuni Anna from Pichu Iyer family, took initiative to build a small temple for this Pillayar on the banks of Kaduvaiyaru river. In the year 2010, Kumbabishekam was done by Mr Rajendran, with help of Mr Sivaraman kurukkal.

In the year 2022, next Kumbabishekam was due & temple structure was due for major repair.

This group just started their activity & this temple kumbabishekam was big project & same was conducted in grand manner with support of all donors in this group. Naga bhagwan was also installed near this temple at the river bank.

Temple as we see today post kumbabishekam

Approach to this temple was a big challenge, as we have to cross a Canal 32 ft wide & reach temple at river bank. Only option was to walk on the shutter gate at this Canal, which was in broken condition, not suitable for us to walk safely.

During Kumbabishekam we built a temporary Bamboo bridge, which lasted for about 2 ½ years and now we replaced with a permanent Galvanized Iron structure as below. This has helped local residents to visit daily river bank to take bath and on way back have darshan at Pillayar koil.
