

Lakshmi Narayanar Temple

We are still in the process of collecting history about this temple. It is to west end of Agraharam. As you can see in above picture road in front of gopuram pass thru Agraharam. Villagers could see deeparadhanai standing at door step of their house. It has beautiful gopuram and vast area around the main sannidhi inside temple compound.

As you enter temple on left back corner there is "Snake Hole" existing for so many years. Even today snake is there & villagers worship offering milk here.

On right corner, on back side of this temple is "Ayyan Kulam" (pond).

Last Kumbabishekam was performed in year "2018"

For ages Pattachari who lived in this village use to take care of pooja. When he expired in year "2019" his younger generation left to city. After we started this group in 2022, daily pooja is taken care.
